

Market Development Facility

Agri-input Partners Profile

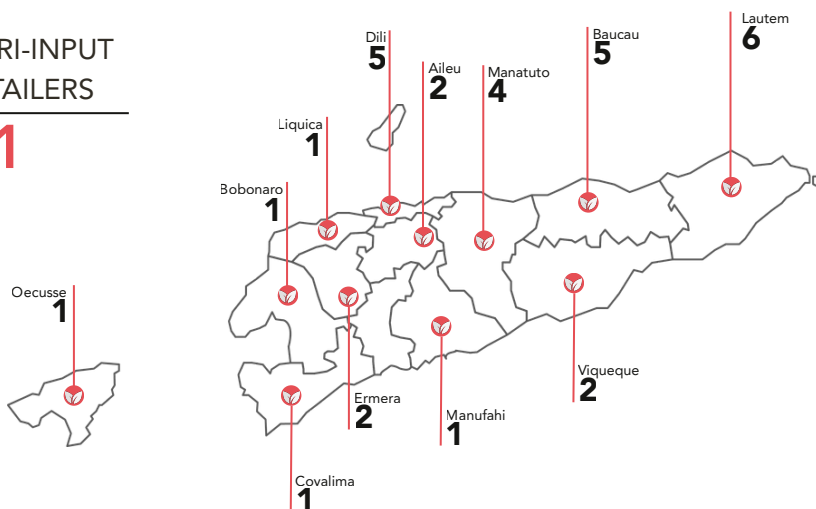

Market Development Facility

Agri-input Partners

Australia's *Market Development Facility (MDF)* program supports Timor-Leste's agricultural input market, emphasising stronger market linkages, from suppliers and importers through to retail outlets and farmers. Better-connected markets are key to improving availability, information and on-farm performance.

AGRI-INPUT RETAILERS

31

Through partnerships with private retailers, MDF is expanding municipal agri-input networks, bringing reliable inputs closer to farmers and reducing upfront costs through harvest-time repayment options.

Currently, **31 retailers** operate nationwide, covering all municipalities except Ainaro.

About MDF:

Australia's Market Development Facility (MDF) helps countries in the Indo-Pacific region to grow through improved productivity, economic diversification, competitiveness and trade.

MDF helps government and business partners to identify markets that have high potential to grow, be profitable, and deliver social and environmental value.

MDF supports catalytic innovation in these markets by co-investing with local and international partners to reduce the costs and risks of early-stage commercial opportunities. This accelerates progress to profitability and scale. Our aim is to do good by supporting good business. MDF supports business investment and innovation that reduces poverty, economically empowers women and combats climate change.

MDF is funded by the Australian Government through the Department of Foreign Affairs and Trade (DFAT) and is implemented by Palladium in partnership with Swisscontact.
